

TRANSFUSION & INFUSION

IV Cannula | Intravenous Catheter | Peripheral perfusor:

Bevel type needle for easier less traumatic insert. Thin Wall FEP catheter with X- Ray opaque line.

Flexible and kink resistant catheter is double tapered with rounded tip for smooth introduction and minimum discomfort to the patient.

Injection port with one way valve and color coded cap for intermittent and safe administration of drugs during infusion.

Flexible wings provide easy and secure fixation and also prevent skin contact with luer lock connector.

High transparent flash back chamber for an easy view of returning blood.

Luer lock cap for closing the proximal end of the catheter after removing the needle.
